MAGICAL MUSIC IN YOUR CAR

with **Porta-Tape®**

Enjoy a concert of your choice on tape cartridges that play through PORTA-TAPE and your car radio. PORTA-TAPE is a magnetic tape player that you can own for \$69.95, completely installed under your dashboard or above your transmission housing.

You still listen to your car radio whenever you want. But, flick a switch and you're enjoying music you have personally selected — static-free, without interference or commercials! From Beethoven to the Beatles. Even children's songs and stories. Thousands of cartridge selections are available.

The music is enclosed in cartridges that are all ready to slip into your PORTA-TAPE. *No threading is necessary.* When the playing cycle is completed, the tape will automatically begin to repeat the music — if you wish. *No rewinding is necessary.*

Each standard monaural cartridge provides you with up to 1 hour of music. Larger cartridges play up to 2 hours before repeating! Cartridges can be purchased like record albums, by label and artist.

Every PORTA-TAPE is fully guaranteed. Both PORTA-TAPE and the cartridges are manufactured by TelePro Industries, who have been supplying these continuous tape cartridges to the broadcasting industry for more than a decade.

Write to TelePro for the name of your nearest PORTA-TAPE dealer.
